

## Gender Neutral Housing & All-Gender Restrooms:

An All-Gender restroom is a restroom that can be used by any person regardless of biological sex, gender identity or expression. These restrooms can benefit many individuals including those individuals that may identify as either trans, gender nonconforming, or any other identity. The All-Gender restrooms can also prove beneficial for those individuals who identify as altered and may require the accompaniment of an attendant of a different gender.

At Purchase College, most of our All-Gender restrooms are designed for single use. For our purposes, a single use restroom is defined as one that is typically a small lockable area that includes both a toilet and a sink, and sometimes a shower. Regardless of the gender, these restrooms are intended to only be used by one individual at a time. Some suites within the residence halls will begin to offer Gender Neutral housing, and therefore the restrooms within these spaces will also be available for any person to use. Finally, there will be select areas in which corridor bedrooms will provide Gender Neutral housing. Due to this, these common corridor hallway restrooms will also be made available to any person. These spaces will have different signage clearly depicting alternate images from what is usually seen on a standard men's or women's restroom; the signage will say "All-Gender Restroom".
