

## Health Services Secure Messaging Portal for Students

As part of Health Services' electronic medical record system, the secure messaging portal for communication from Health Services to students with a reply option is up and running. When a secure message is sent from Health Services, students will receive an email in their Purchase email account from [NoReply@HealthServices.com](mailto:NoReply@HealthServices.com). When you open the email, there will be a link to click on that will direct you to the portal. Log in with your Purchase credentials. You will see the Home page that will allow you to view upcoming appointments, your secure messages, walkout statements and educational flyers from previous visits. You may reply to secure messages but not initiate messages.

If you want to access the portal directly, go to <https://purchase.medicatconnect.com> and log in as above.

For initiating messages to staff at Health Services, please continue to call the main number 914-251-6380 and for appointments call 914-251-7925.
